

27 July 70
P.F.A.D.C. - FD. 82-70
P. 11 JLB

Received in marking tape sealed box cont. br. paper bag labeled 137-70 cont two plastic bags stapled to a card tag "13 plastic vials cont. fingernail scrapings, hair samples, fibers & veg. samples taken from victim at Wash Army Hospital" marked on bottom of vial 17 Feb 70 BSH

#1 Mouth - area around mouth. (C+B)

fibers + one long hair

#2 Right hand Mouth (not marked by Browning)

sm. amt debris - 2 small fragments that could be hair, but no def. hair found nothing was wrapped up in the paper

#3 anterior pelvic smaller M. Donald child (C+B)

one piece of straw-like vegetation

#4 fingernail scrapings right hand larger M. Donald female child (not labeled by Browning)

2 sm. frag. + debris

#5 veg. scraping ESB.

#6 left hand (not labeled by Browning)

2 sm. frag.

#7 fingernail scrapings left hand smaller female M. Donald (not labeled by Browning)

1 hair? - 2 fragments

#8 fingernail scrapings left hand larger M. Donald female child (not labeled by Browning) 15

questionable hair fragment

#9 fingernail scrapings (R hand smaller)
M^cClodd female (not labeled by LEOB)
3 fragments

E-4 #10 Hair (R hand) rather (LEOB)
1 good hair
1 ? hair or fiber

#11 skin abrasion opposite (R forearm) rather
(not labeled LEOB)
2 good fibers

#12 rather very scrapings

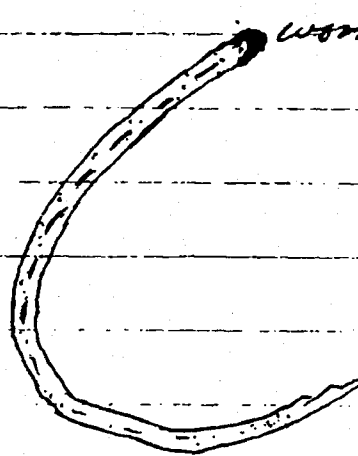

E-5 #13 left hand rather
all ribs marked on bottom by 17 Feb 70 BPH

Microsize

- Not to 300 thru 305
305 thru 313 compare
- #2 no hairs - fibers only
 - #4 fibers only
 - #6 fibers only
 - #7 fibers + one light brown narrow hair, no medulla, striated, intact root, tapered end
 - #8 one light brown narrow hair, ^{not like narrow #7} no medulla, intact root, sword end, not as ^{pointed} tapered as #7.
 - #9 fibers only
 - #10 one fiber; one hair - bloody

#13 one hair - bloody

^{E-5}
#13 approx 1 inch - curved - worn end

narrow diameter
the same width
fine pigment gran
interrupted medulla
darker color along
sides

E305 = too black

E306 = ~~gray-brown~~ diam. varies - bulbous

E307 = ~~gray-brown~~

E308 = " " tapered

E309 = " " "

E310 = " " diam. varies - tapered - worn end but not
like #13

E311

E317 black brown - diam. varies;

E318 medulla too heavy; diam. varies; tapered

E-5 #13 ^{compared} ~~to~~ ~~to~~ ~~to~~ 306

mounted ^{E-5} ~~to~~ between the two hairs of 306. The

two hairs of 306 were had more pts of similar

to each other than ^{E-5} ~~to~~ had to them. Some areas

are quite similar but the complex case is not
same as 306. - Calling Negative. 306 is tapered
slightly and ^{E-5} is all the same width and color.

#5 799 not similar to 300 thru 308

#10 ^{E-4} approx 3" long - longer than any
from E 300 thru 308
medulla cont. & distinct for the most part
not intact; tapered end (rounded) *
distinct pigment granules
not to E 300 thru 308; ~ to #1 except
for length, but probably head hair.

#1 long head hair - bloody - long tapered end
not cut; distinct medulla interrupted; *
shrunken root; light brown chromatin.

Comparing ^{E-5} #3 - none of the hairs 300-308 had
the same type of wavy, even shaft end.

did not label all the other visib. cont. fibers &
hairs (#1, #2, #8) but gave #'s & slides correspond
to these #'s, since they are not going to
be reported by me.

#7
