Several pieces of wood identical to the wood of Exhibit A. - Two pieces of yellow tissue paper with bloodstains

Ex E-304 - One black sweatshirt, property of Capt MacDonald.

Removed several hairs from the sweat shirt - all were animal hair, similar to horse hair - could find no hair to see as a hair of Capt MacDonald.

Exhibit E-305 - One pair of rubber surgeon gloves with cream colored paint. Removed paint and examined under the microscope. Identical to the brown paint from Ex A, as Ex 203, and Exhibit A4 in color and texture. Ran on D.C. and got good comparison as chemical composition. It is the opinion of the chemist that all of these paints could have originated from a common source.
